

 **Swemacimaging**[™]
Company Profile

Company Mission and Vision

Our Values

We deliver the highest quality
We are sustainable in everything we do
We focus on solutions not problems

Our Mission

To to empower orthopedic
practitioners and contribute to
the continuous improvement of
orthopedic healthcare.

Our Vision

To revolutionize orthopedic surgery by
offering state-of-the-art X-ray imaging
solutions that enhance surgical
capabilities, streamline surgical
workflows, and ultimately improve
patient outcomes.

About us

Swemacimaging is a pioneering force in the field of orthopedic imaging, specializing in the development and delivery of high-performance X-ray solutions tailored for orthopedic surgery. Since our establishment, some 50 years ago, we have consistently set industry benchmarks, providing orthopedic professionals with cutting-edge imaging technologies that elevate the standards of speed and surgical precision.

Swemacimaging was founded based on the idea of two orthopedic surgeons in Sweden. Their idea was simple, the ability to x-ray simultaneously in a 90-degree angle. By doing so they would be able to greatly improve the speed and quality of orthopedic surgeries.

Together with SAAB Aerospace the surgeons developed the Multiplane, or C-ring which later evolved into the G-arm, when the ring was opened. It has since born the name Biplanar®.

We are proud to continue to improve on our legacy and spread the gospel of the Biplanar® method to an ever-increasing community of healthcare professionals around the world.

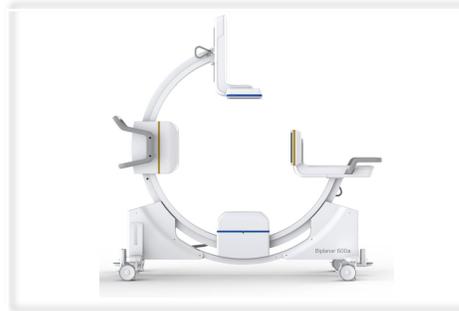

What we do

Swemacimaging specializes in developing and selling the mobile G-arm Biplanar®.

It is used for minimal invasive orthopedic surgery. Predominately on lower extremities and spine.

Our aim is to improve the workflow in the operating theater and outcome of the targeted procedures.

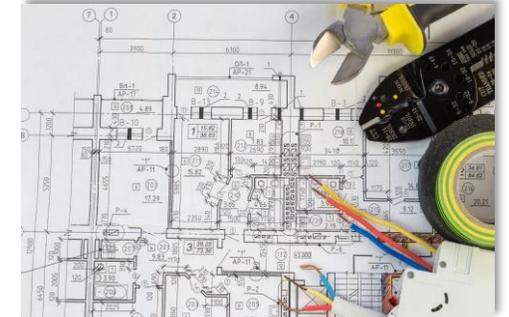

Development

Our products are designed and developed in-house and manufactured in Sweden

Sales

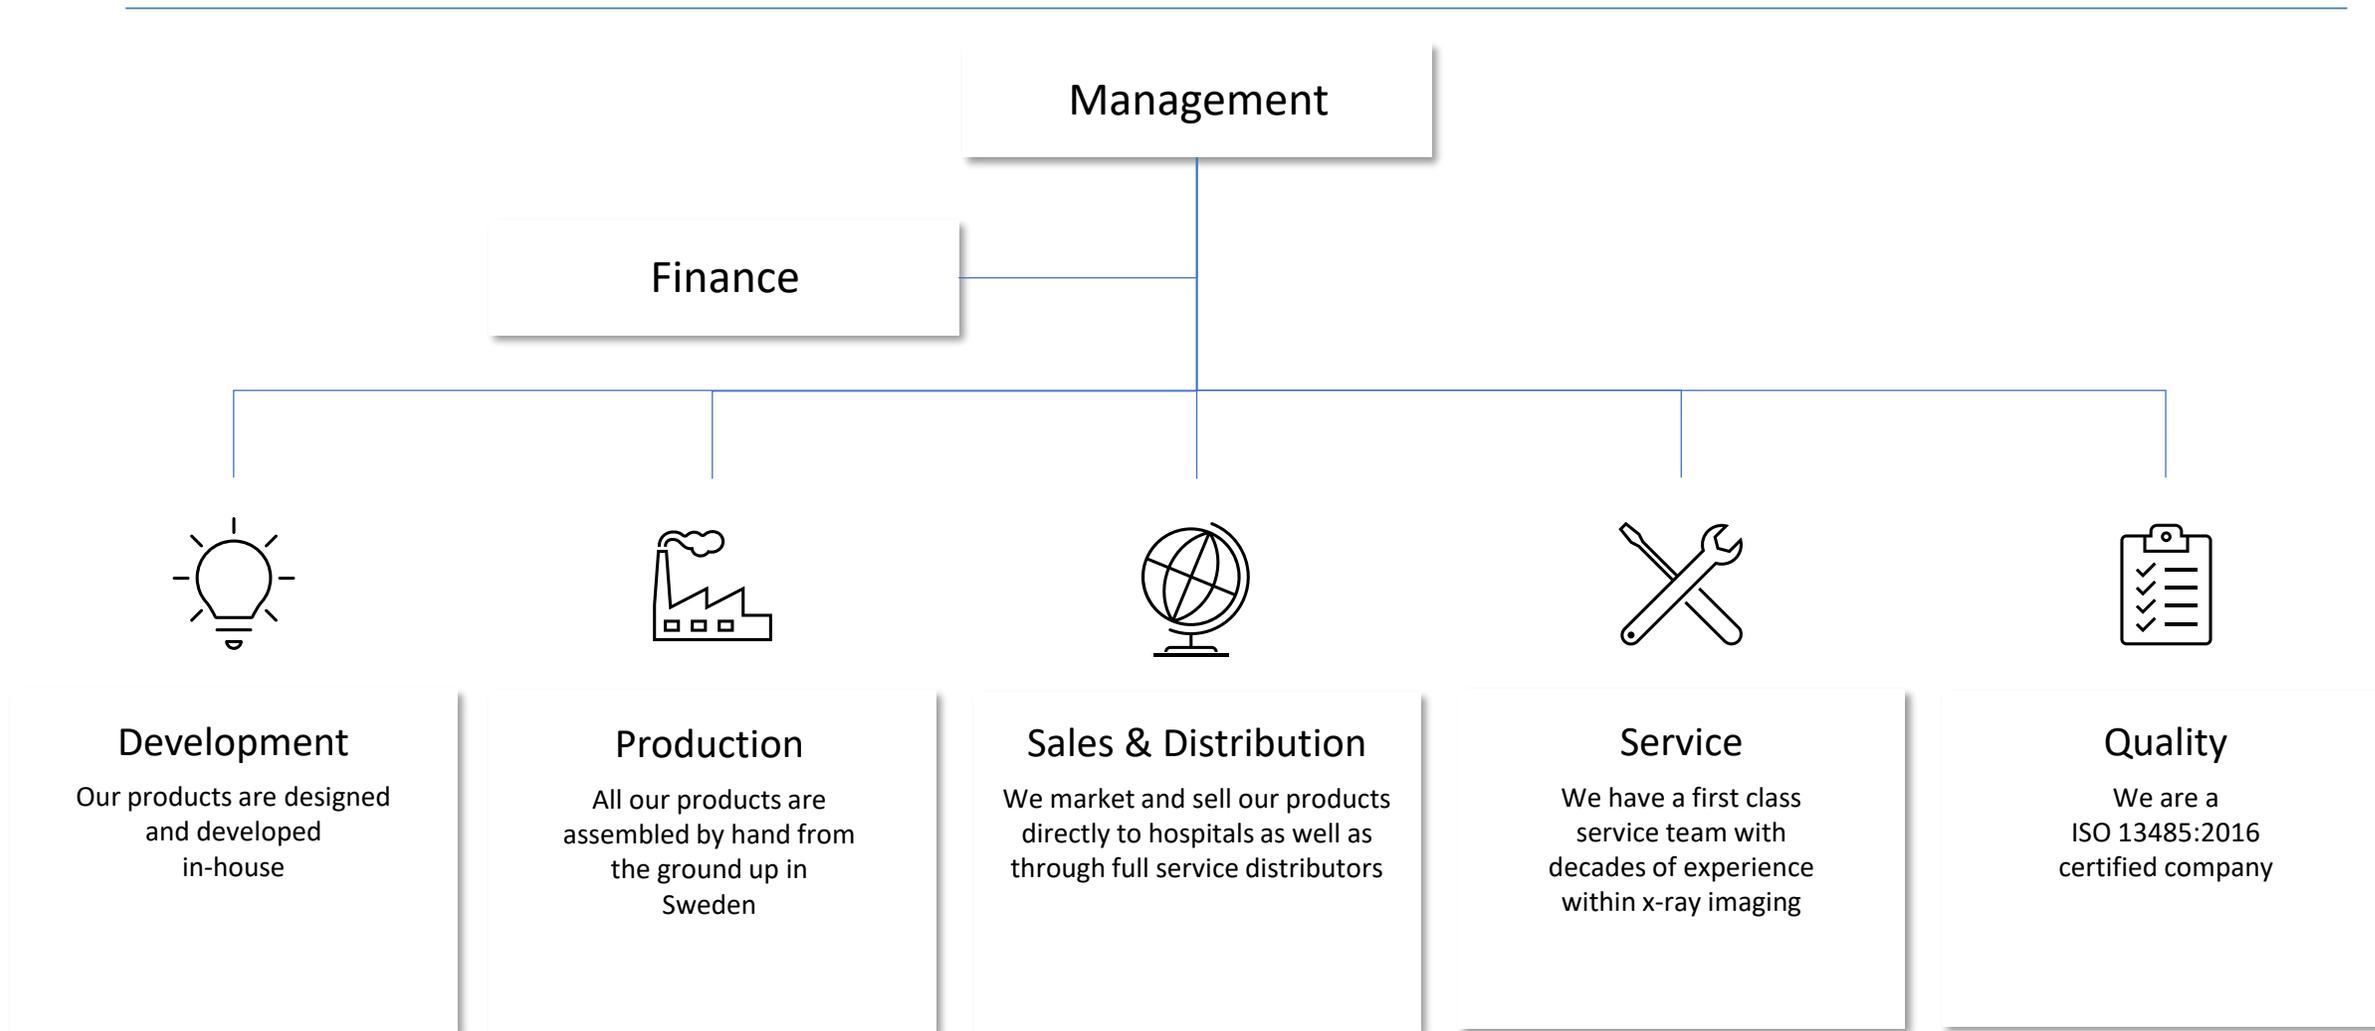

We market and sell our products directly to hospitals as well as through full service distributors

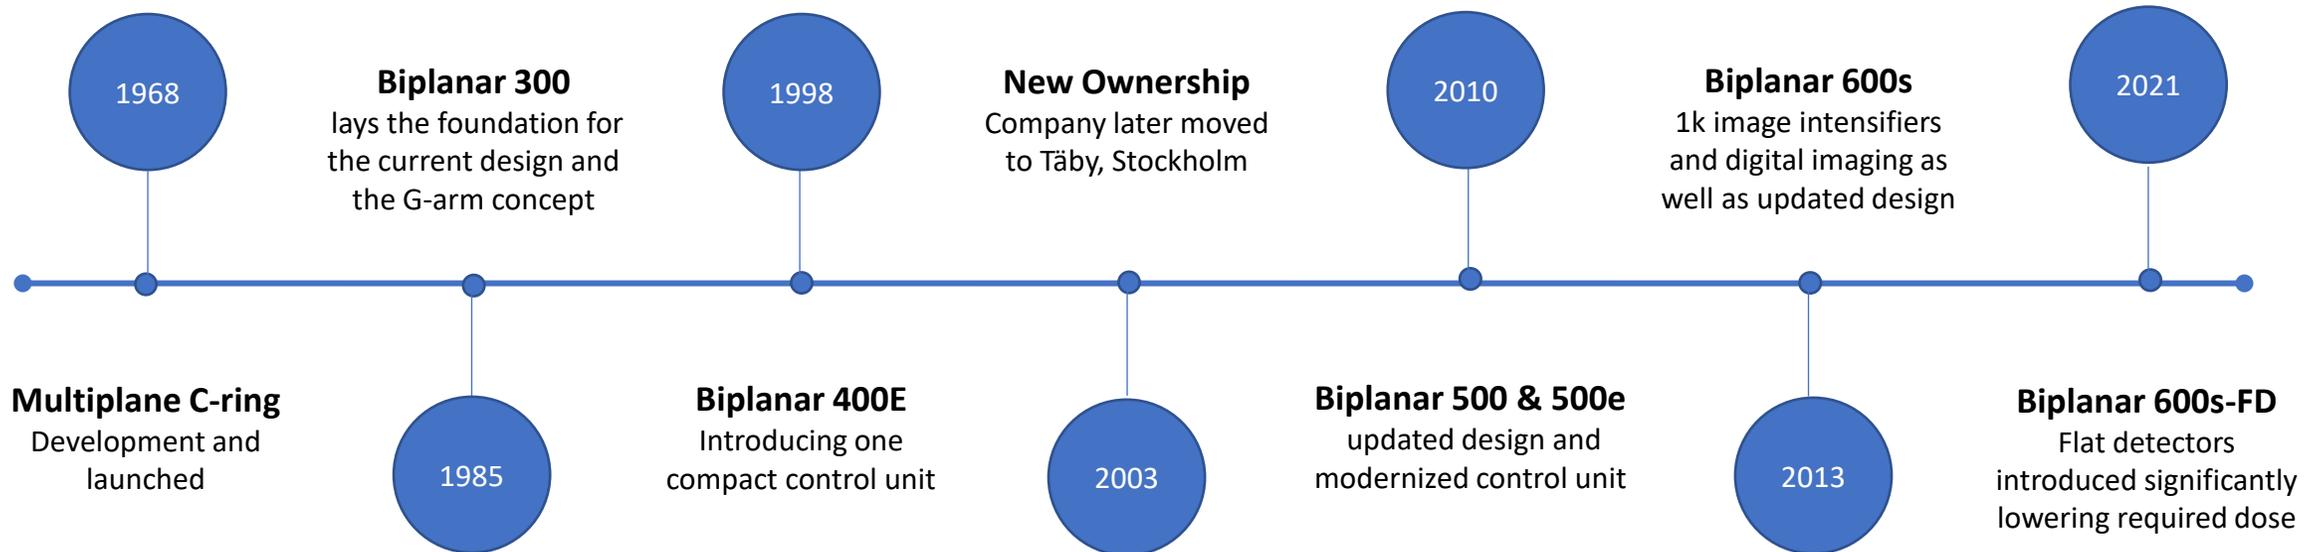

Service

We have a first class service team with decades of experience within x-ray imaging

Our Organization

Key Milestones

The Group

Scanflex | *Healthcare*

Swemacimaging™ is owned by Scanflex Healthcare AB, a privately held company specializing in high quality and high impact medical products.

Within the group we develop, produce and sell products and services within four main areas, as seen below.

Radiation Protection

Three decades of research and innovation has made us one of the most trusted manufacturers of products for Personal Radiation Protection for Radiology and Nuclear Medicine.

Scanflex | *Medical*

Scanflex | *Sirad*

Surgical Imaging

The unique BIPLANAR™ Dual View Surgical Imaging solution offers the ideal functionality for orthopedic and trauma surgery procedures.

Swemacimaging™

Radiotherapy

High performance patient fixation equipment and treatment accessories designed to provide individual and clinical useful solutions for modern radiotherapy treatment demands.

Par Scientific

Skeletal Health

Everyone should have the right to know their bone health. Through our award-winning DXL technology it's now possible to diagnose and categorize patients early.
